14th CIDOC CRM Special Interest Group Meeting

Venue: FORTH, Heraklion Crete, 25th October 2006

Participants: Trond Aalberg (BIBSYS, Norway), Martin Doerr (ICS-FORTH, Greece), Dolores Iorizzo (The Imperial College, UK), Patrick Le Boeuf (National Library of France), Stephen Stead (Paveprime Ltd, UK), Christian Emil Ore (university of Olso, Norway), Allen Renear (GSLIS/ UIUC, Illinois, USA), Chryssoula Bekiari (ICS-FORTH, Greece), Mika Nyman (Helsinki), Richard P. Smiraglia (Long Island University, USA)

Wednesday – 25th of October

1. The CIDOC CRM, a standard for the integration of cultural information (Short tutorial for newcomers by Martin Doerr and Steve Stead)
2. Status report of CRM SIG activities.
3. Issues for CRM amendment:
   - Movement of domain of P33 used specific technique (was used by) E29 Design or Procedure from E11 to E7 (accepted)
   - Move P32 used general technique from E11 to E7 (accepted)
   - Recording empirical provenance and other process chains. We discussed about how we document a range of things. If we have a process which consists of more than discrete stages, how we document each stage or group of stages.
     Also we decide that we should have the confirmation from CIDOC SIG to work on this subject.P69 is a property candidate to describe sequences of procedures. The question is if it factual or plans. Martin will sent from Tsisparas workflow to Steve

   - Adding F14 Identifier and R51 consists of (forms part of) to the CRM ?
     We noted here that the FRBR identifier is more general of object identifier, we decided to make a complete model for proposal to integrate F14
4. E28 Conceptual Object has been revised by Steve-
5. Steve noticed that there are information objects that are not conceptual objects like "sparrow". All accepted Steve's notice.
