Session	Weight	Issue #	Issue Title	Issue Description	Issue Facilitator	Email Discussion I	Email Discussion II	Working Document	Homework Owner	Issue Type	Issue Status	Issue Last Update	comment	Issue Initiator	Issue Second	Homework Status	Relevant Model
CRM.47.1.1		459	modelling principles	Make clear for IT experts the phrase "The CIDOC CRM is a formal ontology in the sense introduced by (N. Guarino 1998)" without causing overdetailing it for other experts from other domains. Solution: Use of footnotes. / In basic concepts about identity	Christian Emil Ore			Issue 459 WD	Christian Emil Ore	4	Open	29/4/2020	HW by MD [Guarino definition]; HW expected by CEO; HW ML & KN (I have not sent an email) This issue has been discussed in the editorial meeting 11/5/2020 and the outcome is added to the current introduction to the CRMbase	Martin Doerr	Christian Emil Ore		base 7.0
CRM.47.1.1		458	Proofreading of scope notes of P79-P80-P81-P82	Describe in natural language how inner and outer bounds intervals are combined in information integration	Martin Doerr			Issue 458 WD	Martin Doerr	3	Open	29/4/2020	HW by MD - P81-P82	Martin Doerr	Steven Stead	Ready	base 7.0
CRM.47.1.1		471	graphical examples	The Winkelmann example in the introduction should be illustrated by a symbolic space-time diagram.	George Bruseker					4	Open	30/4/2020	postponed after 7.0 release	Martin Doerr	George Bruseker		base 7.0
CRM.47.1.1		456	compatibility statement	Should the compatibility statement be improved distinguishing conformance and compatibility? Since the current version is the compromise achieved with ISO in 2014, and no expert engaged, proposed to close the issue.	Christian Emil Ore			Issue 456 WD	Christian Emil Ore	4	Open	30/4/2022	no HW expected, the issue is pending The issue will be left open for now, but will not be revisited in the context of version 7.0. It should be discussed again in the future (quoted from the issue)	Martin Doerr	Robert Sanderson	Postponed	base 7.0
CRM.47.1.1		386	Functional identity of E24 Physical Man Made Thing		Christian Emil Ore			Issue 386 WD	Christian Emil Ore	3	Open	1/17/2020	HW expected from CEO	Christian Emil Ore	Martin Doerr	Unknown	base 7.0
CRM.47.1.2		453	declarative time-spans	P170 and P4 need to reflect declarative versus phenomenal time-spans, and how time-spans can be shared	Martin Doerr			Issue 453 WD	Martin Doerr	3	Open	30/4/2020	This issue is a continuation of issue 434. It already resolved the Issue 453 simultaneously. However, it gave wrong cardinalities. These must be updated also in the graphics in the introduction.	Martin Doerr		Ready	base 7.0
CRM.47.1.2		428	the scope notes of E59 Primitive Value and E61 Time Primitive		Christian Emil Ore			Issue 428 WD	Christian Emil Ore	3	Open	1/13/2020	expected HW by CEO about the scope note of E61 - together with issue 390	Christian Emil Ore	Martin Doerr	Unknown	base 7.0
CRM.47.1.2		387	E13 Attribute Assignment	This issue had to do with re-writing the scope note of E13 and adding a new property in order to indicate the property that one was asserting to hold between two things being related by the statement. This work has been done.	George Bruseker			Issue 367 WD		3	Open	10/17/2019	should be closed	Martin Doerr	Rob Sanderson	Ready	Base 7.0???
CRM.47.1.2		468	Broaden the scope note of P126	How to model the use of cleaning substances that do not constitute a modification of an object. Discussed solution: modify scope note of P126 employed (was employed in). Why not broaden the sense of E11 Modification? (MD)	Thanasis Velios					3	Open	30/4/2020	HW by Thanasis about the scope note of P126,	Thanasis Velios	Martin Doerr		base 7.0
CRM.47.1.2		489	Rename the P164 & P1674-p167	P164 during (was time-span of) to become concerns (is concern of) P167 at (was place of) to become was within (includes)	Steve			Issue 489 WD	Martin		Open	2020-06-20	HW expected from Steve, Martin and George				
CRM.47.2.1		490	how-to-model-a-file	I have a file; a word doc, a jpg image, a powerpoint. I want to represent it in CIDOC CRM and connect it the semantic network and do so in a way that would be interoperable with all other well formed instances of CIDOC CRM. How do I do that?							Proposed	2020-06-21	It is not ripe for taking decisions, no assignment				
CRM.47.1.3		462	Is P181 has amount different from P90 has value?	P181_has_amount seems to make no difference compared to its super-property of P90_has_value, because P180 has currency already specifies a unit specific to E97 Monetary Amount. deprecate P180.	Martin Doerr			Issue 462 WD		3	Open	30/4/2020	proposal by RS to deprecate P181	Robert Sanderson	Martin Doerr		base 7.0
CRM.47.1.3		426	Pxx represents entity of type	This issue proposes a new property with domain E36 and range E55 type. The semantic function of this property is to be able to document the kind of relationship between a physical object and a physical property.	George Bruseker	https://www.mail-archive.com/ocrm-sig@ics.forth.gr/msg00178.html		Issue 426 WD	Rob Sanderson	3	Open	24/2/2020		Rob Sanderson	Nicola Carboni	Ready	Base 7.0???
CRM.47.1.3		475	Transfer of Custody Scope Note Problem	The transfer of custody scope note indicates both that it is about physical transfer of custody and that it is not specifically about physical transfer of custody but the kind of transfer can be documented using p2. The proposal is to modify the content of the scope note in order to eliminate this irregularity.	George Bruseker	https://www.mail-archive.com/ocrm-sig@ics.forth.gr/msg00178.html		Issue 475 WD		3	Open	19/2/2020		Rob Sanderson	George Bruseker	Unknown	Base 7.0???
CRM.47.1.3		426	Pxxx holds or supports	This is about things being physically together but not part of either one.	Martin Doerr			Issue 426 WD		3	Proposed	2/18/2020	Temporary Aggregates Presentation				base 7.0??
CRM.47.2.1		463	Scope note of E37 Mark	The scope note of E37 Mark should make clear enough that it is a superclass of E34 Inscription. Any narrower distinction should be types of Marks or Inscriptions. The new scope note proposed by MD describes intentions as typical and not definitional.	Martin Doerr	https://www.mail-archive.com/ocrm-sig@ics.forth.gr/msg00079.html		Issue 463		3	Open	22/6/2020		Martin Doerr			base 7.0
CRM.47.2.1		457	harmonization of graphical documentation about CRM	The SIG decided to propose a common graphical style for semantic "boxes and arrows" diagrams of parts of the ontology and representing instances. There may be need for a different style for publication texts (.doc., .pdf etc.), for a complete class hierarchy, and for didactic presentations (MD)	George Bruseker			Issue 457 WD	George Bruseker	4	Open	29/4/2020	postponed after 7.0 release	Anais Guillem	George Bruseker	Ready	base 7.0
CRM.47.2.1		450	Update the scope note of E54	drop. error in minutes writing. (CB note: there is HW by MD on 16/6/2020)	Martin Doerr			Issue 450 WD	Martin Doerr	3	Open	30/4/2020	to be checked	Martin Doerr	Martin Doerr	Unknown	base 7.0
CRM.47.2.2		442	Curated Holding vs Physical Thing as Aggregate vs Set	This Issue is on one side about the common confusion of aggregates with collections in the sense of the CRM. That may deserve an FAQ if not yet done. There is a question, if their must be a minimal time of existence for a Physical Thing. In a way, both neglect that the CRM is about properties. This may deserve a scope note change. Finally it is about holdings versus lists of things, which are information objects.	Martin Doerr			Issue 442 WD		3	open	30/4/2020	there is a powerpoint presentation by Martin to be discussed.	George Bruseker	Martin Doerr	Unassigned	base 7

Running Issues List.xlsx

Session	Weight	Issue #	Issue Title	Issue Description	Issue Faciliator	Email Discussion I	Email Discussion II	Working Document	Homework Owner	Issue Type	Issue Status	Issue Last Update	comment	Issue Initiator	Issue Second	Homework Status	Relevant Model
CRM.47:2.2		383	New has content property	The initial issue was to have a way to connect an instance of E90 Symbolic Object to symbolic content stored in an information system which actually IS the content of that instance of E73 Information Object. It is hard to tell from the issue description that the proposal is for a class that would function in an equivalent manner to Mark but for Audio Items. In the meantime TV did some work in proposing a scope note. At the time of	George Bruseker	https://www.mail-archive.com/crm/		issue 383 WD			3 open	22/5/2018	Whereas I agree with the need for this property, I regard that the issue is not ready, because precise semantics and examples have not been declared. MD	Rob Sanderson	George Bruseker	unassigned	Base 7.02???
CRM.47:2.2		274	Archetypical sounds	This issue was begun in 2015, by SS. The proposal was to make a class that would function in an equivalent manner to Mark but for Audio Items. In the meantime TV did some work in proposing a scope note. At the time of	George Bruseker	https://www.mail-archive.com/crm/		issue 274	George Bruseker		3 Open	10/2/2015	The relevance of this proposal should be reinterpreted in the light of cutting down subclasses of E90. MD	Steven Stead	George Bruseker	Ready	Base 7.02???
