

Semantic data and the representation of historical knowledge: the example of the LACRIMALit Ontology

M. Papadopoulou, E.-M. Tamiolaki

Agenda

- The LACRIMALit project ID
- Aim & Scope
- Domain
- Ontologies in DH
- State-of-Art
- The LACRIMALit model
- Crisis as Event in CIDOC
- Competency Questions
- Conclusion

Project ID

LACRIMALit

Funding Agency

Host Institution

Collaborating Institution

Project Duration

36 months
2022-2025

Project PI & Team

Melina Tamiolaki
Associate Professor in Ancient
Greek Literature
University of Crete
[Curriculum vitae](#)

Principal Investigator

Dr. Eleni Melina Tamiolaki, Univ. of Crete, Greece

Team

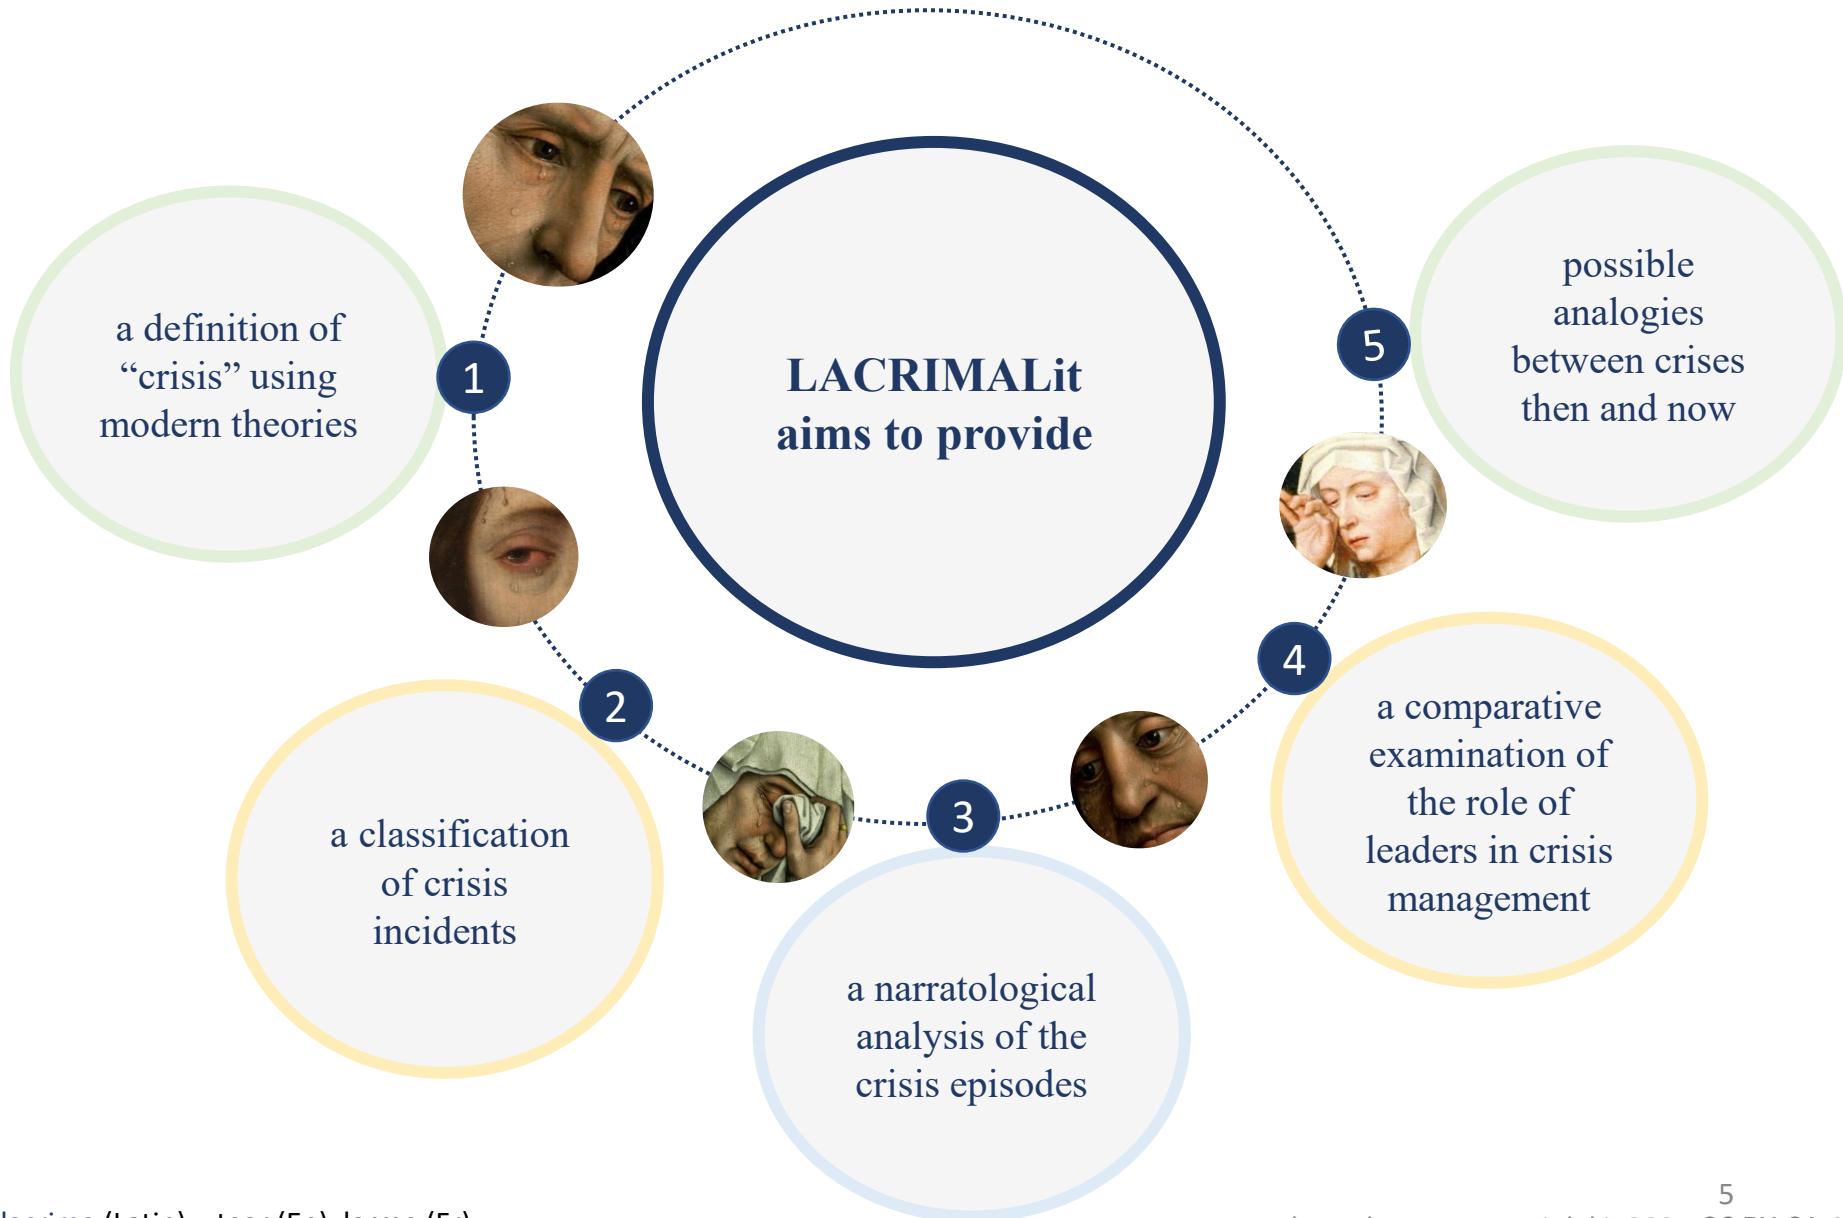

- **Dr. Markus Zimmermann**, Univ. of Bayreuth, Germany
- **Dr. Maria Papadopoulou**, Univ. of Savoie, France
- **3 PhD students**

LACRIMALit

Leaders And Crisis Management in Ancient Literature

*lacrima (Latin) = tear (En), larme (Fr)

Types of crisis events

Emergency crisis incidents:
immediate measures required
e.g., disputes, military threats, wars,
revolutions

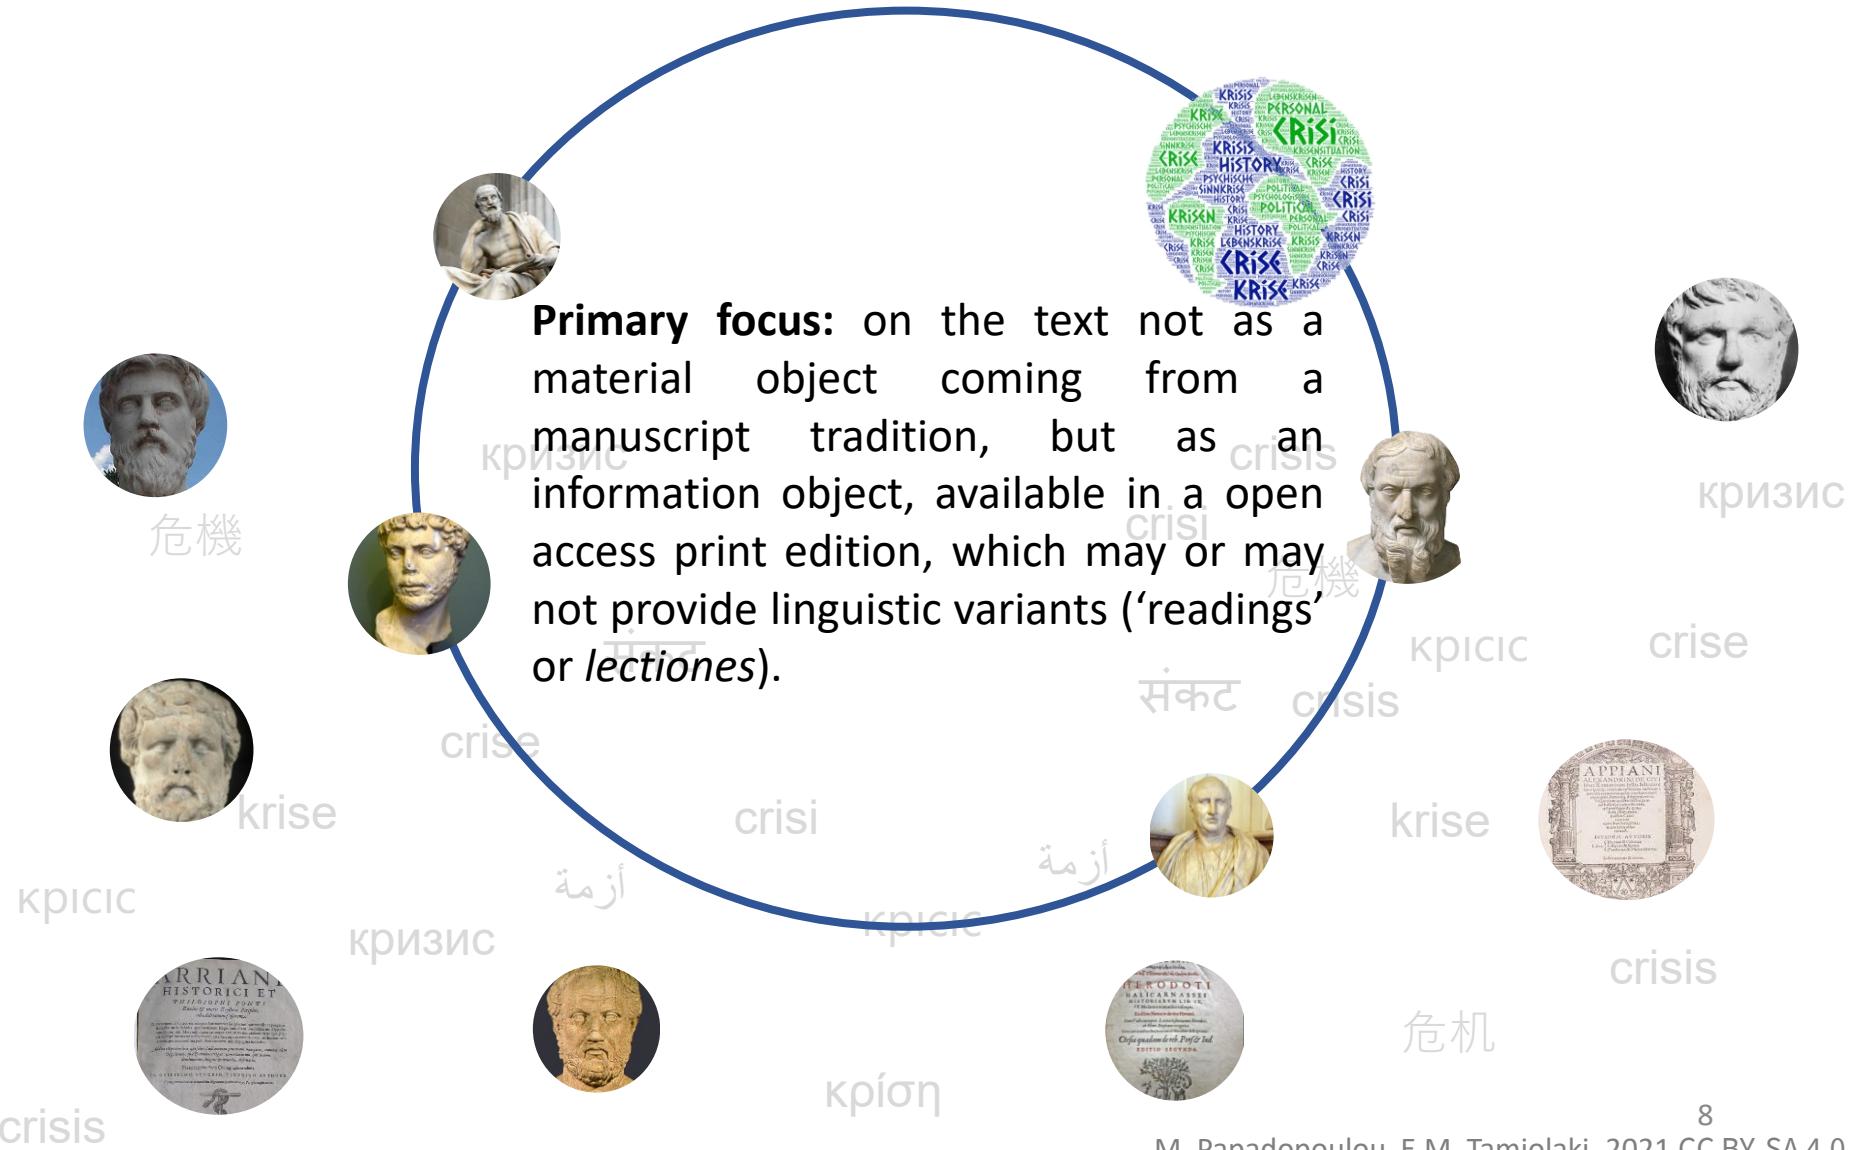

**Breaches of trust between leaders
and their followers:**
means used for restoring order,
e.g., harangues

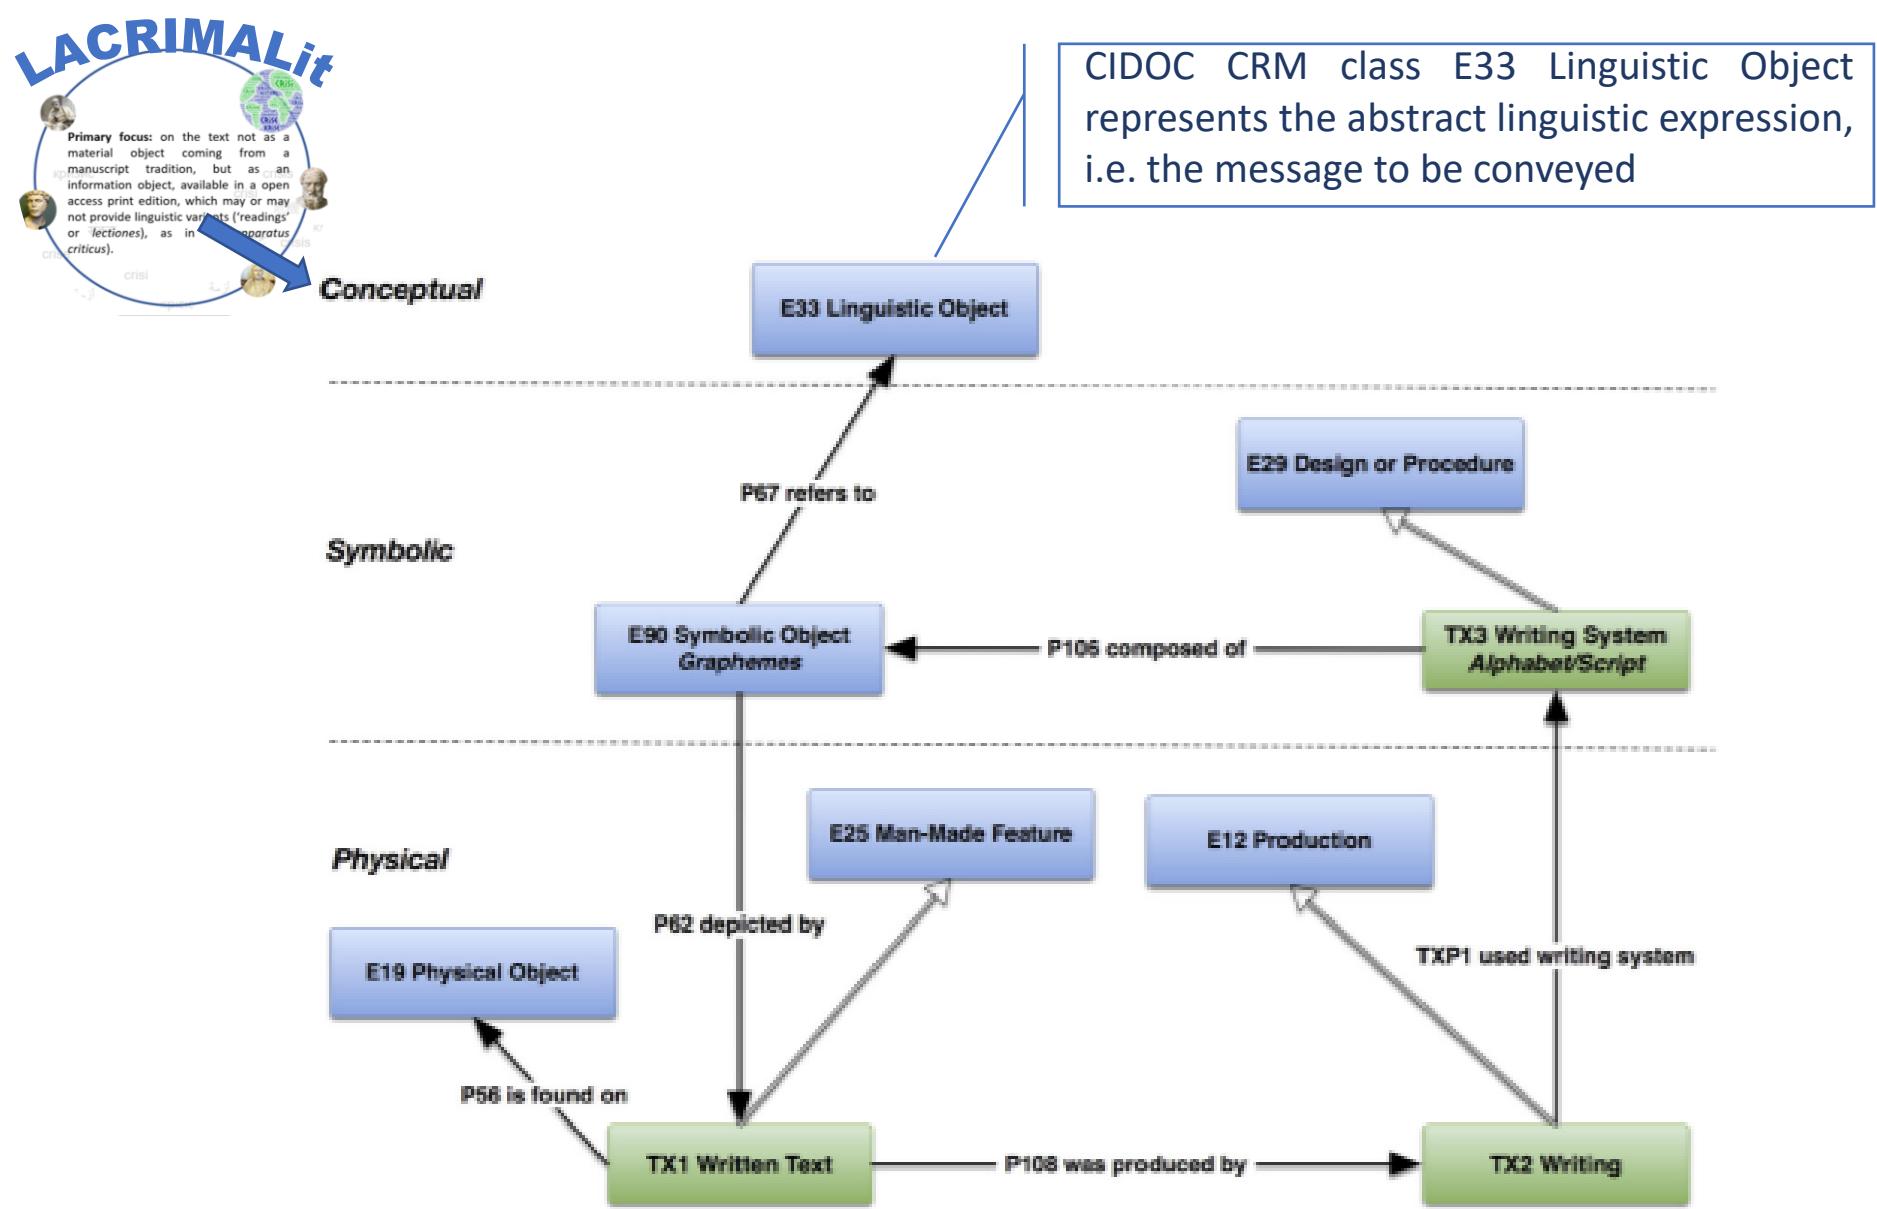

Political crises:
overt challenges to governmental
legitimacy, e.g., conspiracies,
treasons, revolts

Domain

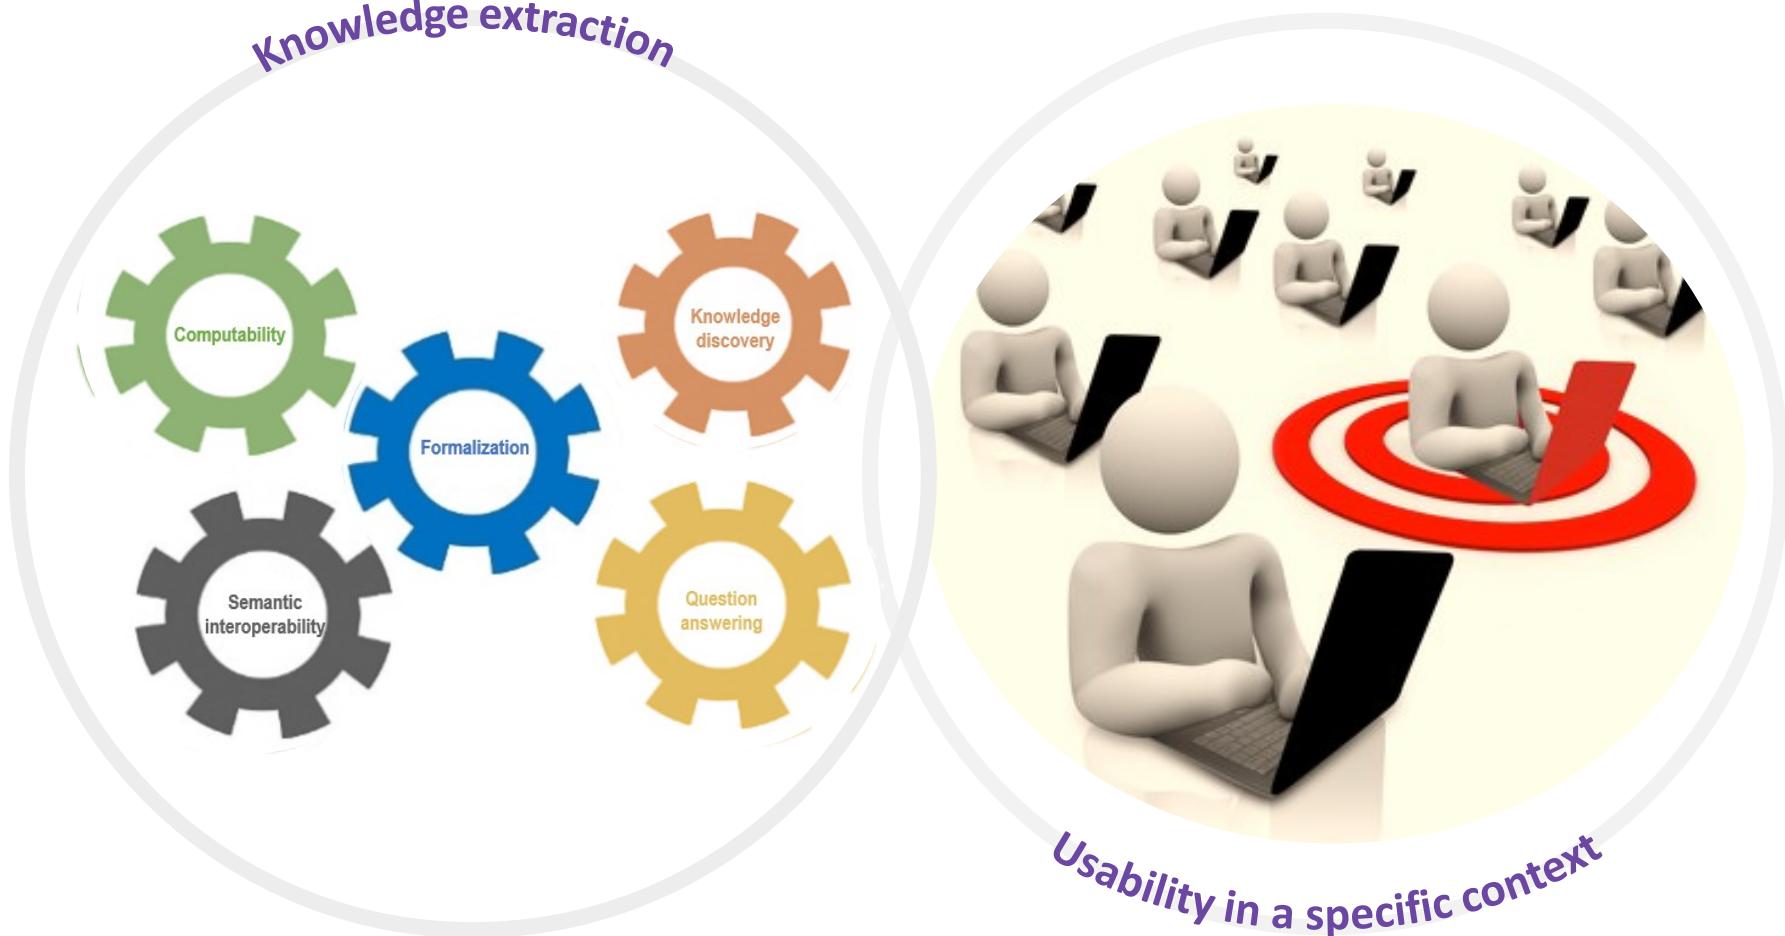

CRMtex-Representation of the writing event, Felicetti & Murano 2017

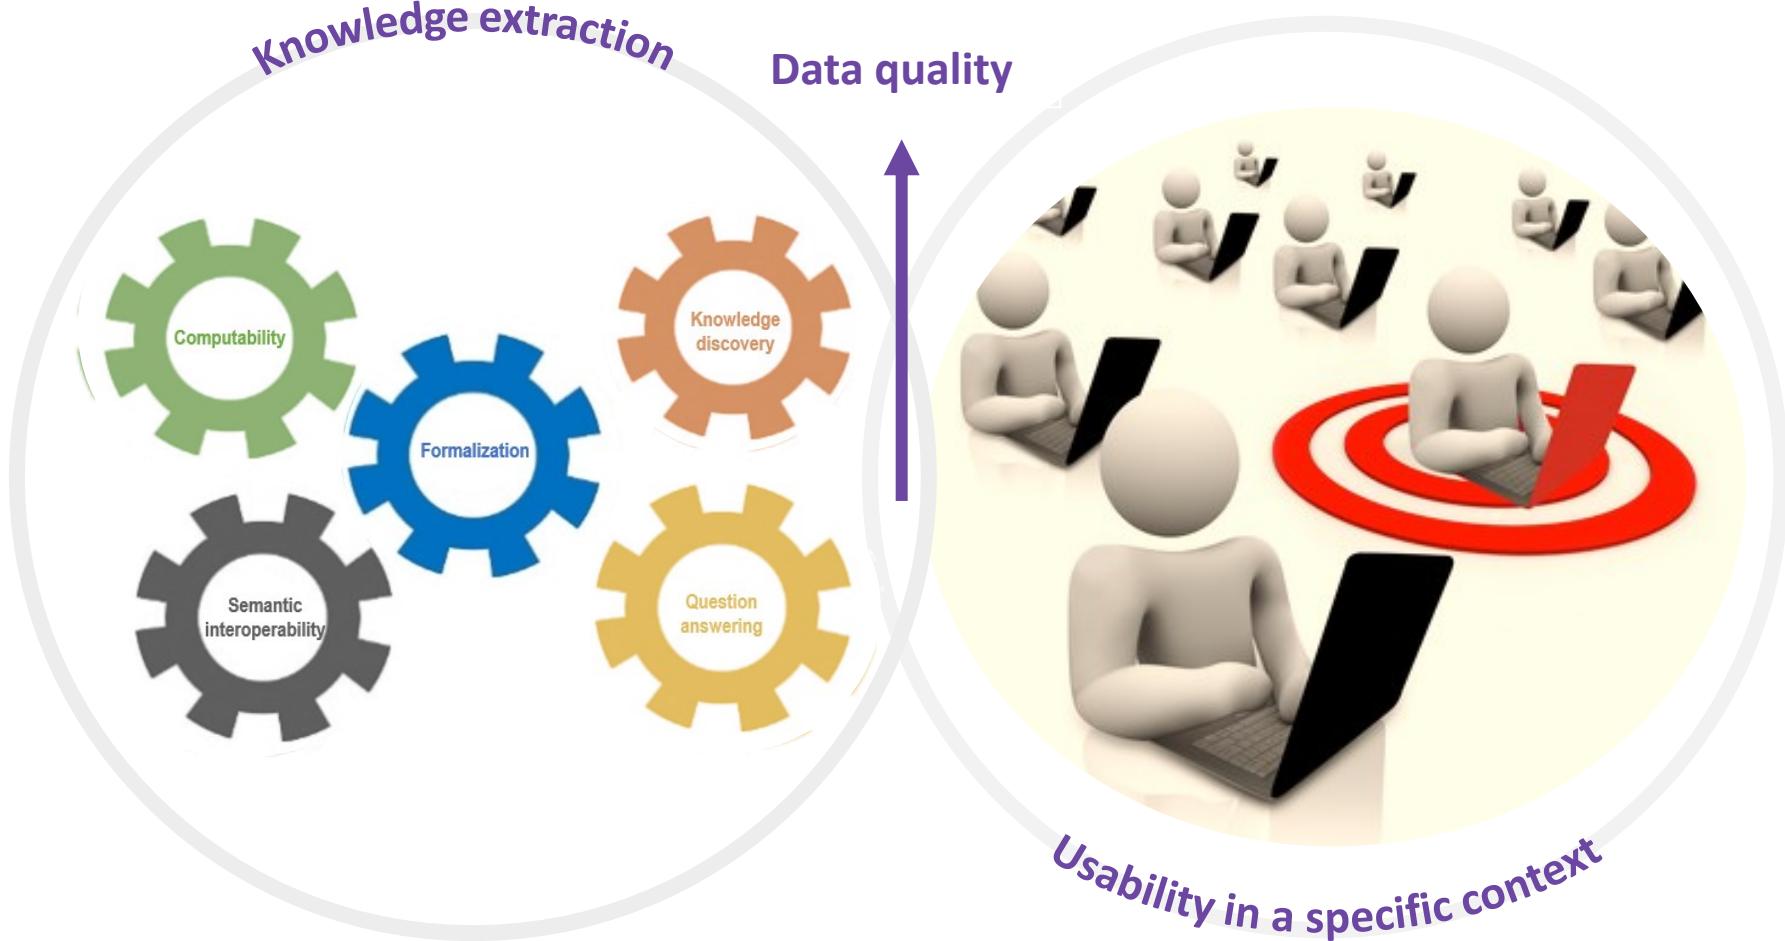

Ontology for data quality

Ontology for data quality

Ontology for data quality

Ontologies in DH

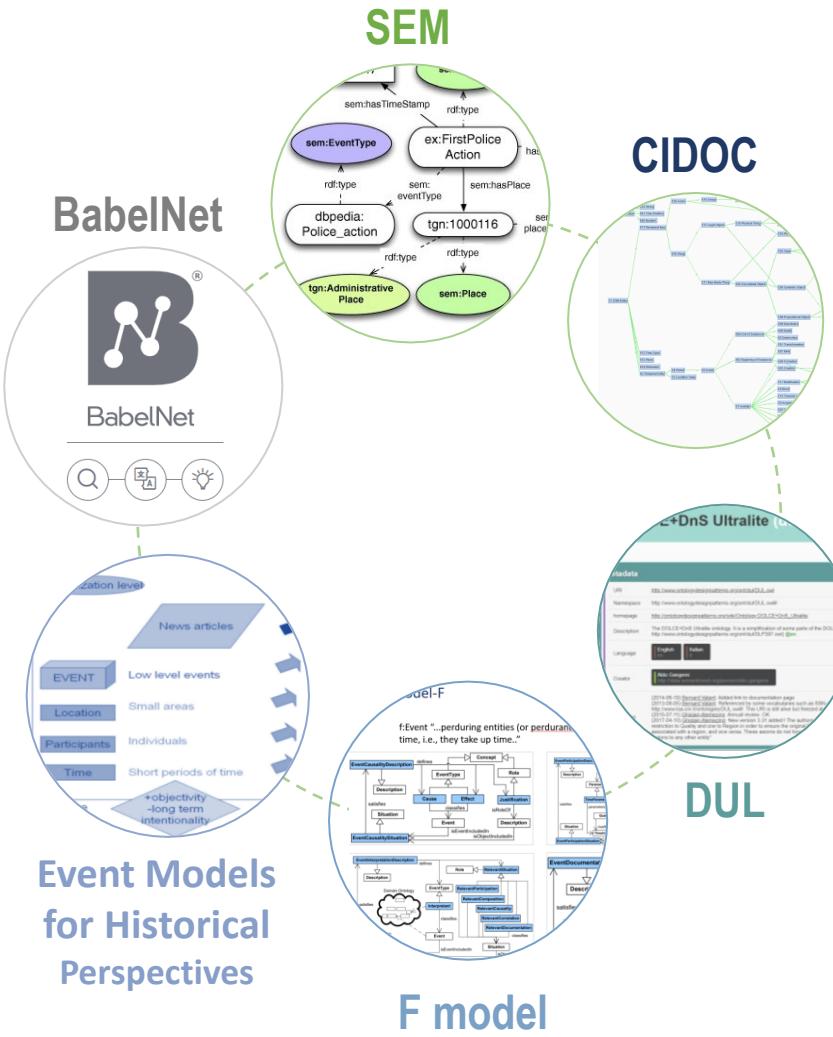

Ontologies are more and more used in the Digital Humanities, although still in an unsystematic and uncoordinated fashion.

Jansen 2019

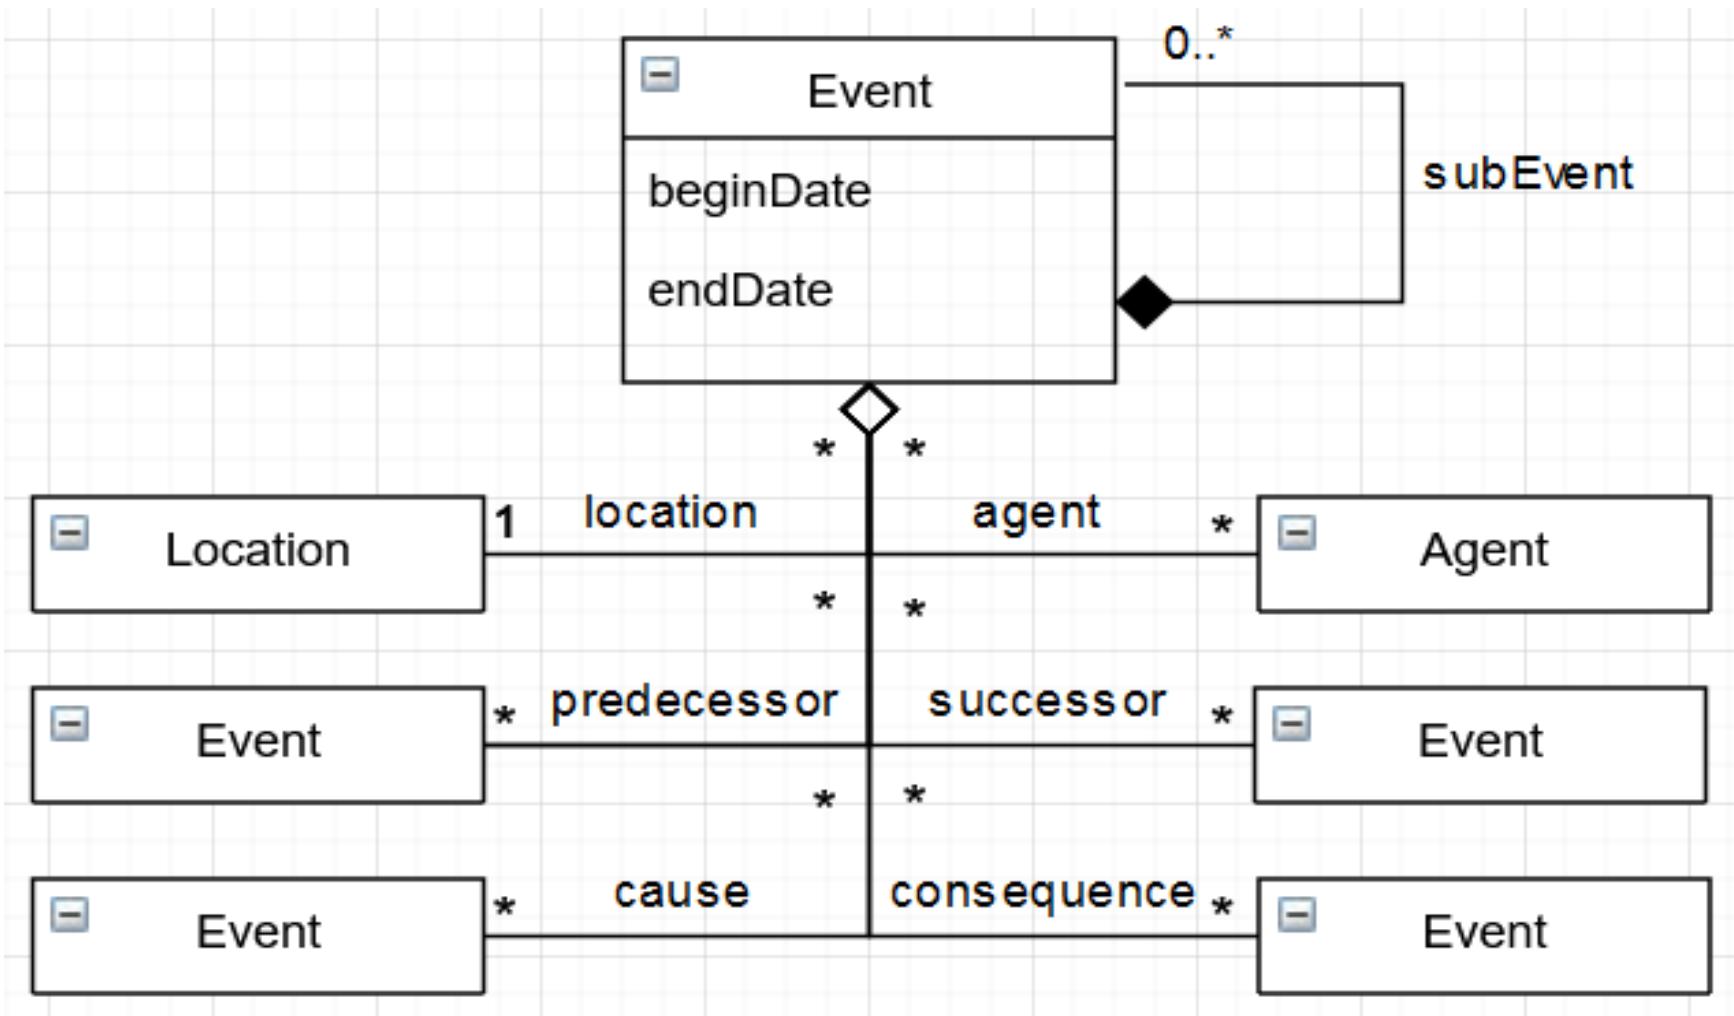

The ability to automatically determine relations between historical events and their sub-events over textual data, based on the relations between event participants, time markers and locations, will have important repercussions for the design of historical information retrieval systems.

Cybulska & Vossen 2010

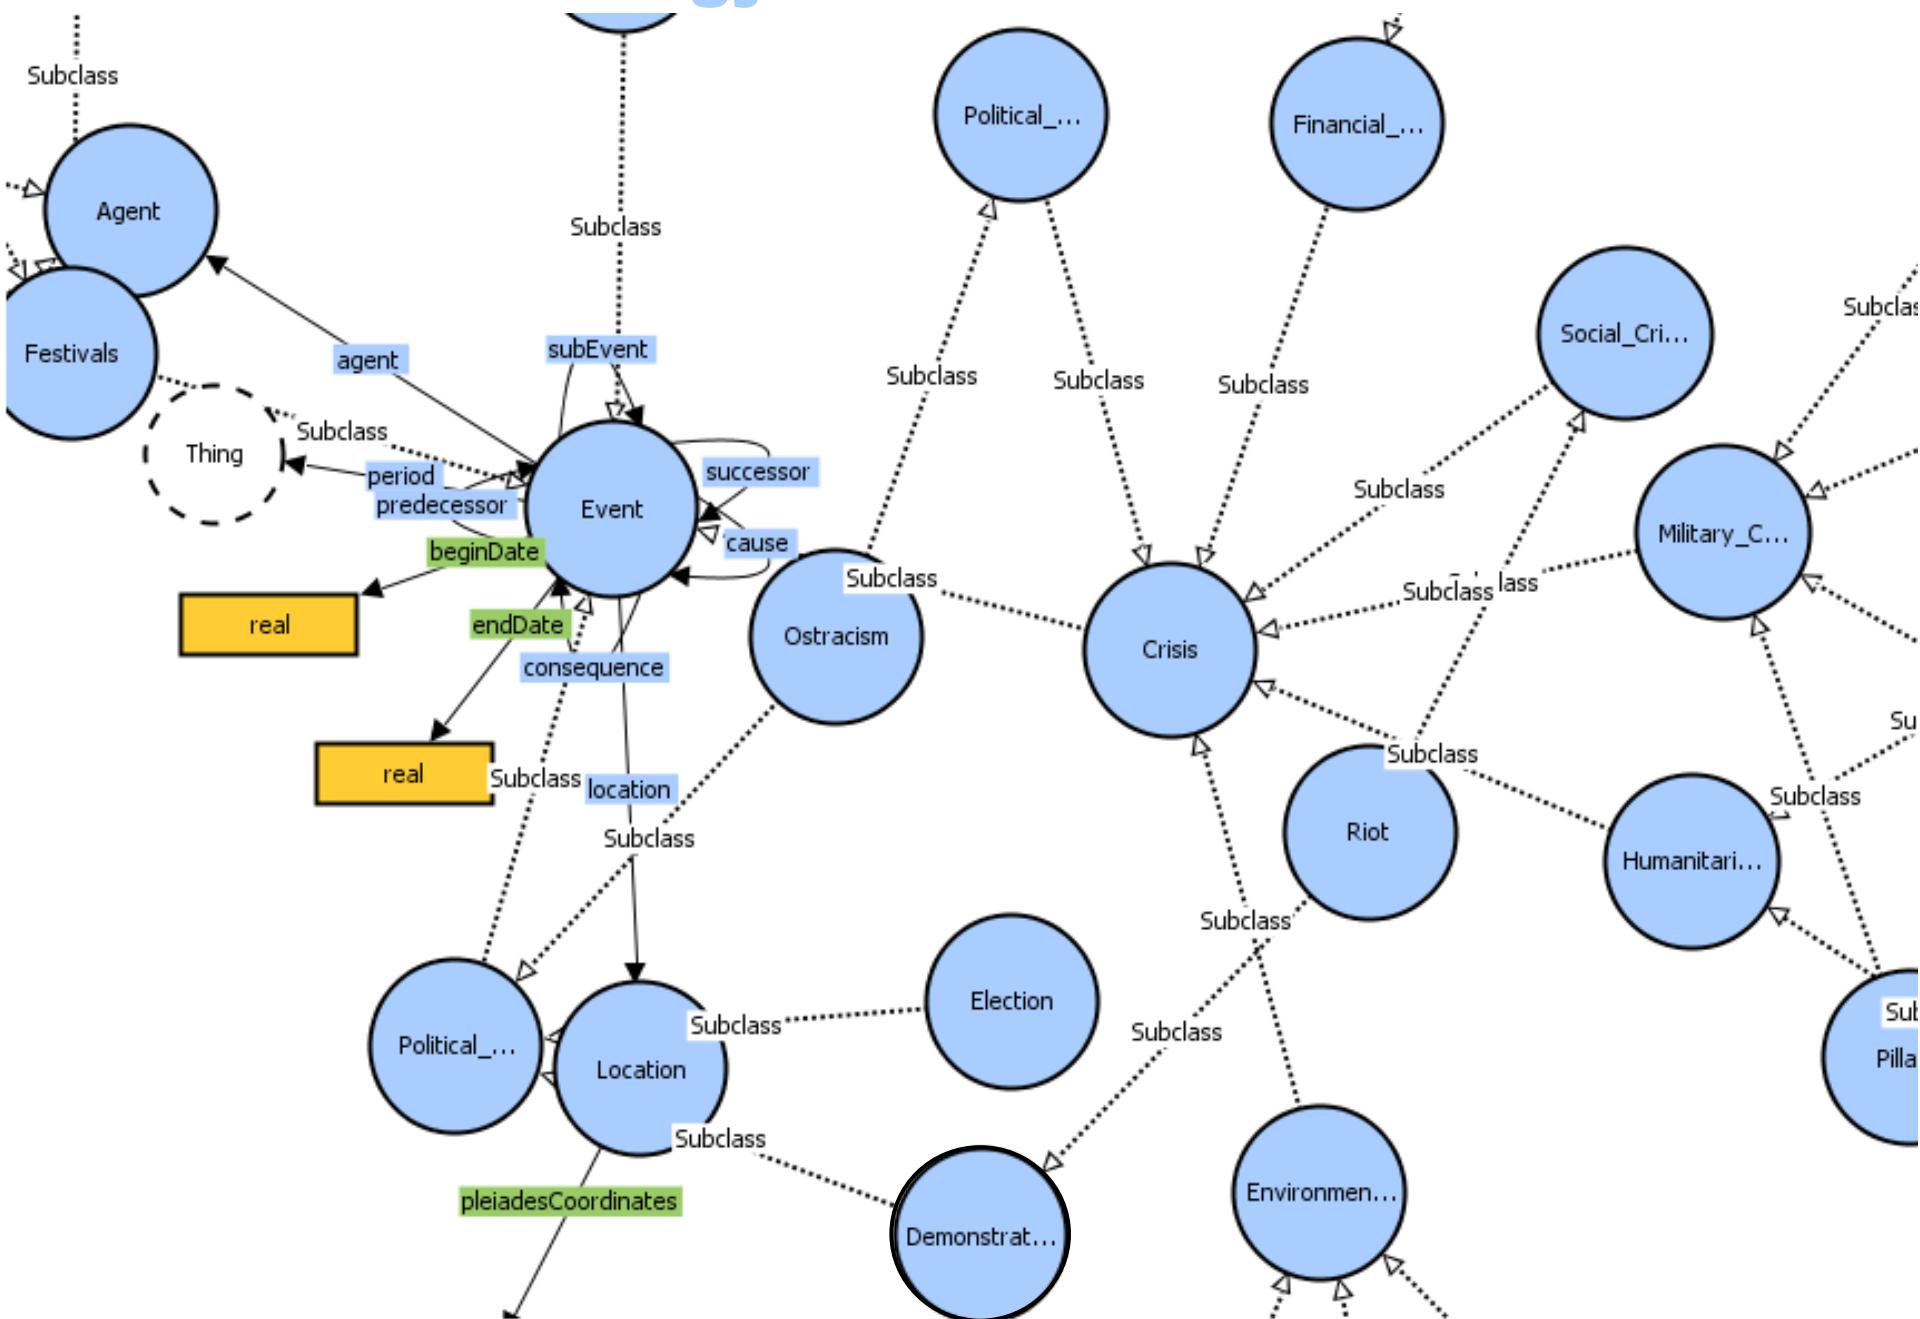

State-of-Art

LACRIMALit Model

LACRIMALit Ontology

Formal definition of crisis events

Class hierarchy:

```
graph TD; owlThing[owl:Thing] --> E1CRMEntity[E1_CRM_Entity]; E1CRMEntity --> E2TemporalEntity[E2_Temporal_Entity]; E2TemporalEntity --> E3ConditionState[E3_Condition_State]; E2TemporalEntity --> E4Period[E4_Period]; E2TemporalEntity --> E5Event[E5_Event]; E5Event --> E63BeginningExistence[E63_Beginning_of_Existence]; E5Event --> E64EndExistence[E64_End_of_Existence]; E5Event --> E7Activity[E7_Activity]; E7Activity --> E10TransferCustody[E10_Transfer_of_Custody]; E7Activity --> E11Modification[E11_Modification]; E7Activity --> E13AttributeAssignment[E13_Attribute_Assignment]; E7Activity --> E65Creation[E65_Creation]; E7Activity --> E66Formation[E66_Formation]; E7Activity --> E85Joining[E85_Joining]; E7Activity --> E86Leaving[E86_Leaving]; E7Activity --> E87CurationActivity[E87_Curation_Activity]; E7Activity --> E8Acquisition[E8_Acquisition]; E7Activity --> E9Move[E9_Move]; E5Event --> Event[Event]; Event --> Crisis[Crisis]; Event --> Festivals[Festivals]; Event --> PerformedFunction[Performed_function]; Event --> PoliticalEvent[Political_Event]; E5Event --> E52TimeSpan[E52_Time-Span]; E5Event --> E53Place[E53 Place]

Κρίση

Description: crisis

Equivalent To +

SubClass Of +

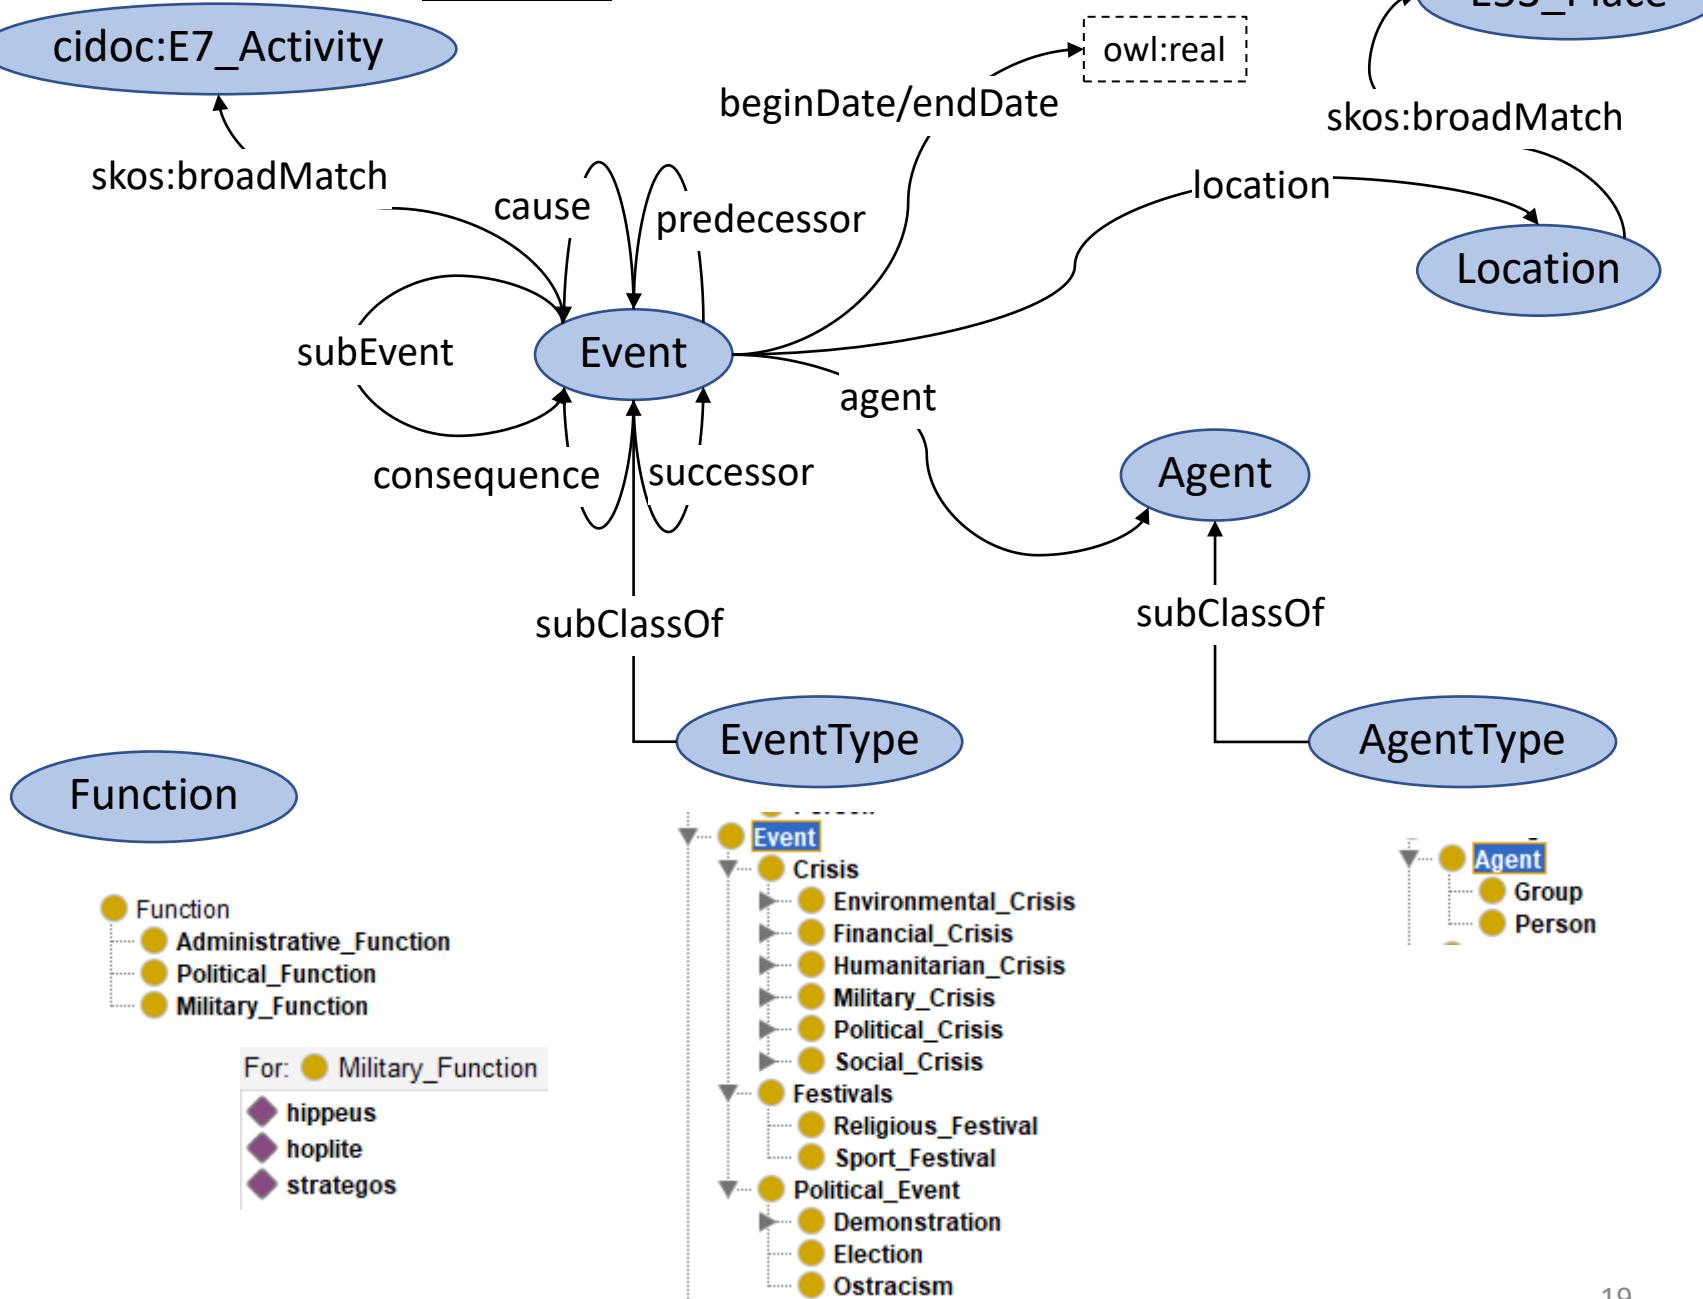

Event

General class axioms +

SubClass Of (Anonymous Ancestor)

- consequence min 0 Event
- endDate some owl:rational
- location exactly 1 Location
- successor min 0 Event
- subEvent min 0 Event
- cause min 0 Event
- beginDate some owl:rational
- predecessor min 0 Event
- 'P7 took place at' some 'E53 Place'
- 'P48 has preferred identifier' max 1 owl:Thing
- 'P14 carried out by' some 'E39 Actor'
- 'P12 occurred in the presence of' some 'E77 Persistent Item'
- 'P4 has time-span' exactly 1 owl:Thing

Crisis as Event aligned to CIDOC

Mapping to CIDOC E7

Subclass of :

E5 Event

In First Order Logic:

$E7(x) \Rightarrow E5(x)$

Superclass of:

E8 Acquisition
E9 Move
E10 Transfer of Custody
E11 Modification
E13 Attribute Assignment
E65 Creation
E66 Formation
E85 Joining
E86 Leaving
E87 Curation Activity

Scope Note:

This class comprises actions intentionally carried out by instances of E39 Actor that result in changes of state in the cultural, social, or physical systems documented.

This notion includes complex, composite and long-lasting actions such as the building of a settlement or a war, as well as simple, short-lived actions such as the opening of a door.

Examples:

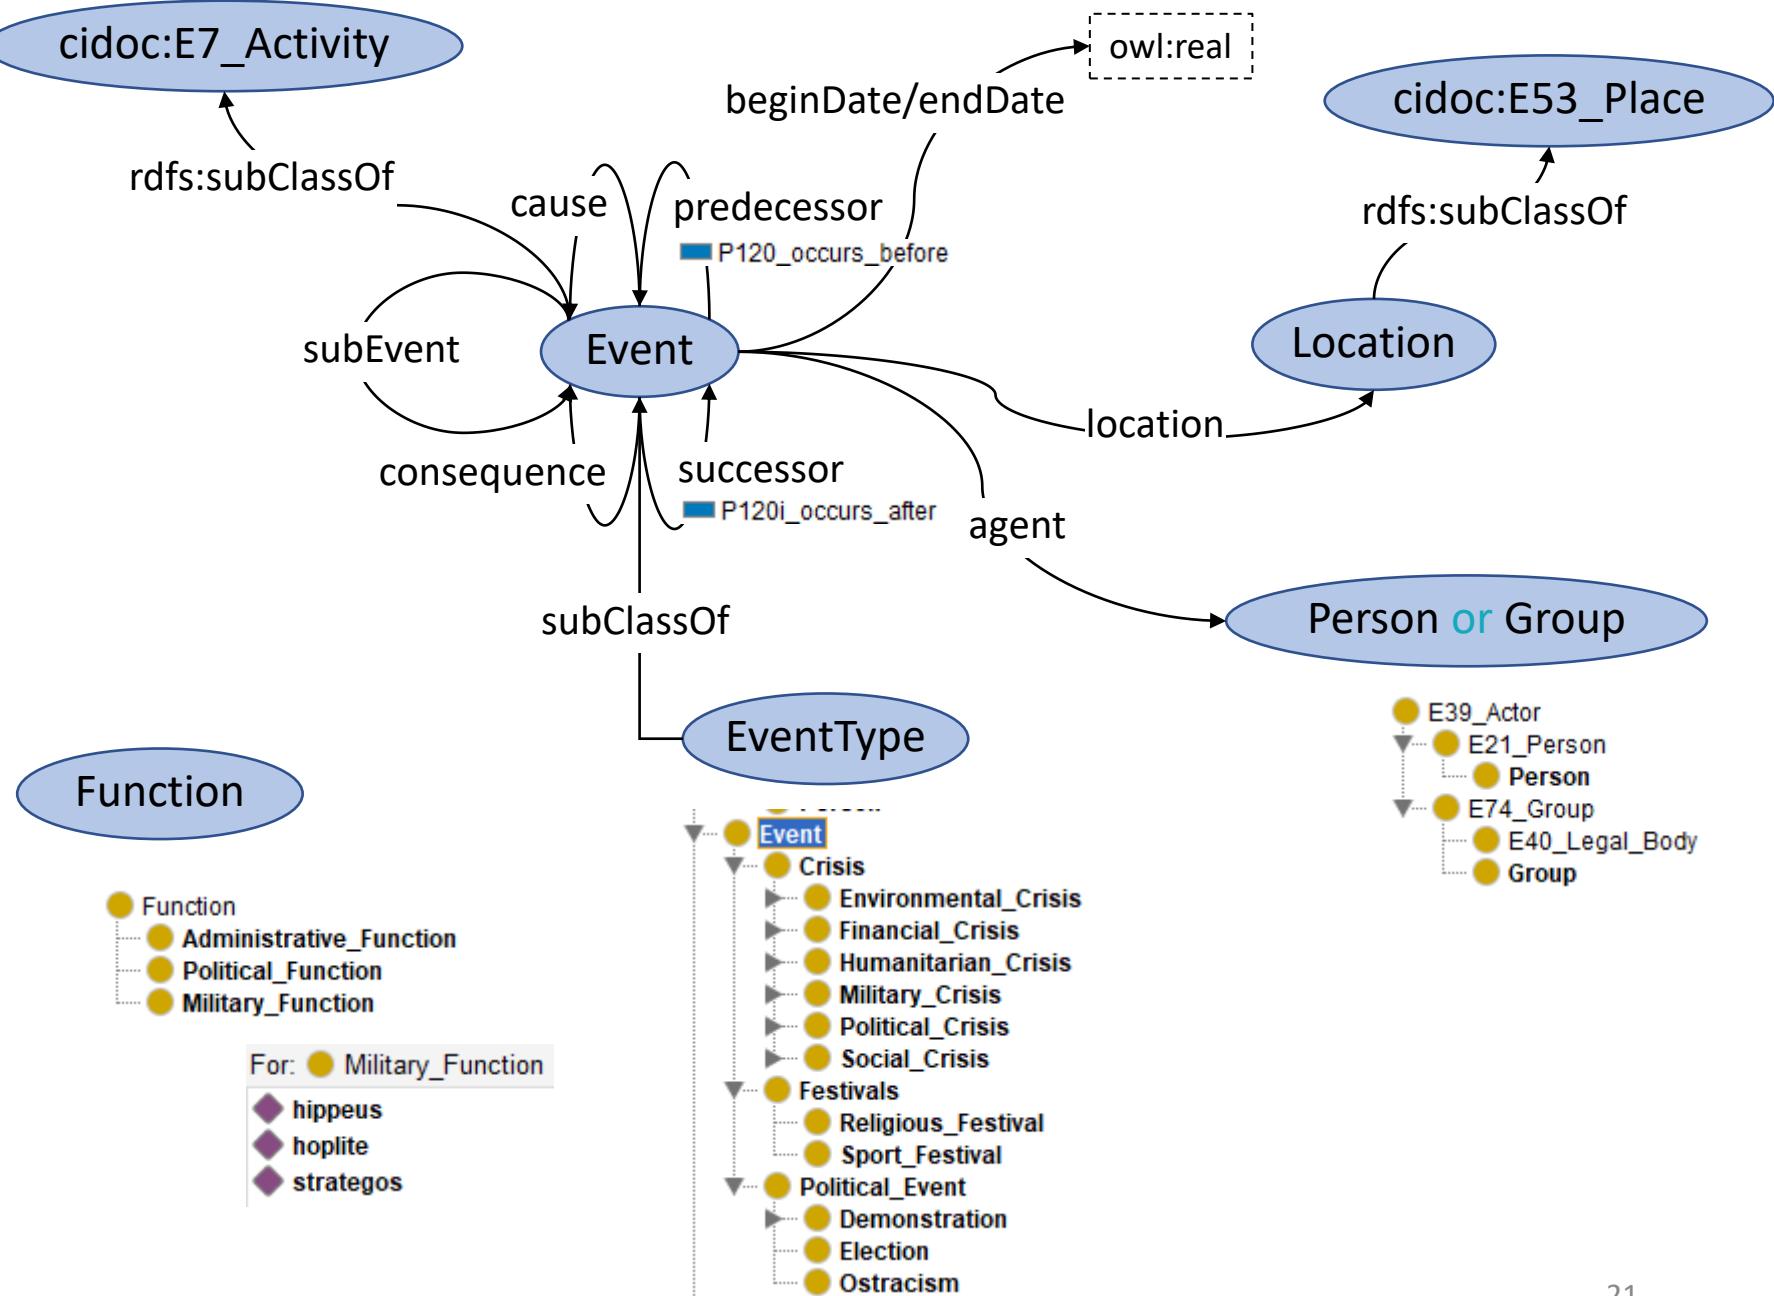

the Battle of Stalingrad (Hoyt, 1993)
the Yalta Conference (Harbutt, 2010)
my birthday celebration 28-6-1995
the writing of "Faust" by Goethe (E65) (Williams, 2020)
the formation of the Bauhaus 1919 (E66) (Droste, 2006)
calling the place identified by TGN '7017998' 'Quyunjig' by the people of Iraq
Kira Weber working in glass art from 1984 to 1993
Kira Weber working in oil and pastel painting from 1993

Properties:

P14 carried out by (performed) : E39 Actor,
P15 was influenced by (influenced) : E1 CRM Entity,
P16 used specific object (was used for) : E70 Thing,
P17 was motivated by (motivated) : E1 CRM Entity,
P19 was intended use of (was made for) : E71 Human-Made Thing,
P20 had specific purpose (was purpose of) : E5 Event,
P21 had general purpose (was purpose of) : E55 Type,
P32 used general technique (was technique of) : E55 Type,
P33 used specific technique (was used by) : E29 Design or Procedure
P125 used object of type (was type of object used in) : E55 Type,
P134 continued (was continued by) : E7 Activity

Crisis as Event in CIDOC

What to consider about crisis events

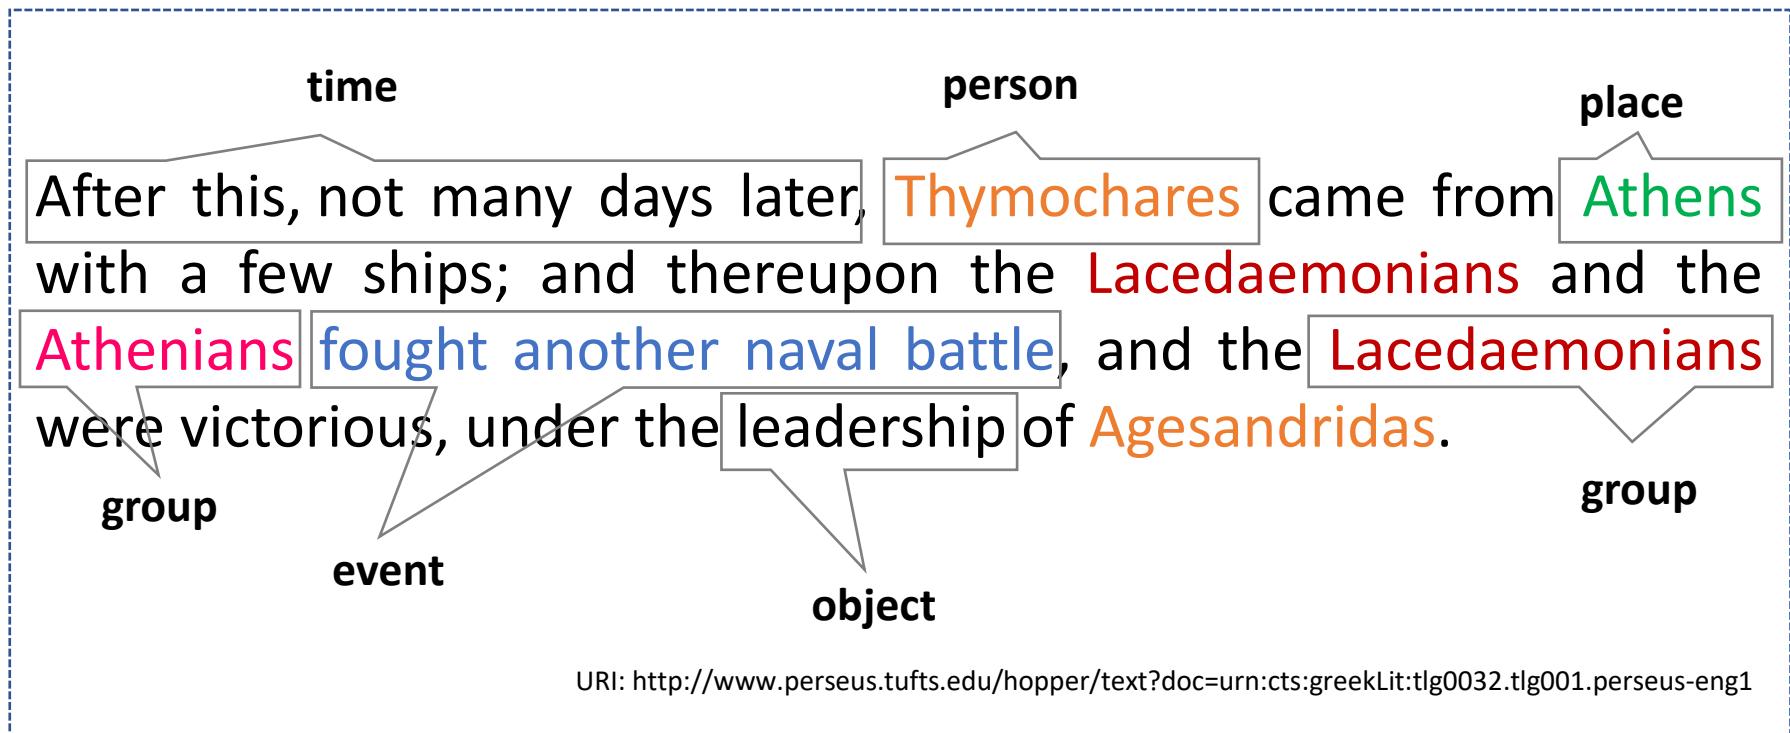

Thuc. 3.80.2

[3.80.2] But the Peloponnesians, after devastating the land till about midday, retired. And at nightfall the approach of sixty Athenian vessels was signalled to them from Leucas. These had been sent by the Athenians under the command of Eurymedon the son of Thucles, when they heard of the revolution and of the intended expedition of Alcidas to Corcyra.

What to consider about crisis events

Xen. Hell. 1.1.1

μετὰ δὲ ταῦτα οὐ πολλαῖς ἡμέραις ὕστερον ἦλθεν ἐξ Ἀθηνῶν Θυμοχάρης ἔχων ναῦς ὄλιγας: καὶ εύθὺς ἐναυμάχησαν αὗθις Λακεδαιμόνιοι καὶ Ἀθηναῖοι, ἐνίκησαν δὲ Λακεδαιμόνιοι ἡγουμένου Ἀγησανδρίδου.

LACRIMALit in Protégé

rdfs:comment

The screenshot shows the Protégé knowledge base interface. On the left, the 'Class hierarchy: War' panel displays a tree structure of classes, with 'War' being the selected node. Below it, the 'Direct instances: Peloponnesian_War' panel lists the individual instance 'Peloponnesian_War'. The main workspace shows the 'Annotations' tab for 'Annotations: Peloponnesian_War'. Two annotations are listed:

- rdfs:comment [language: en]**: A long text block in English about the Peloponnesian War.
- rdfs:comment [language: grc]**: A shorter text block in Greek about the war.

A red arrow points from the word 'Annotations' at the top of the workspace to the first annotation entry. Another red arrow points from the word 'Annotations' in the 'Annotations' tab title to the second annotation entry.

The Linguistic Dimension?

Ontolex-Lemon: Lexicon Model for Ontologies

<https://www.w3.org/2016/05/ontolex/>

Ontologies are an important component of the Semantic Web but current standards such as [OWL](#) only support the addition of a simple label to entities in the ontology. It is not currently possible to add inflected forms, different genders, usage notes or create a full lexical resource such as Princeton WordNet.

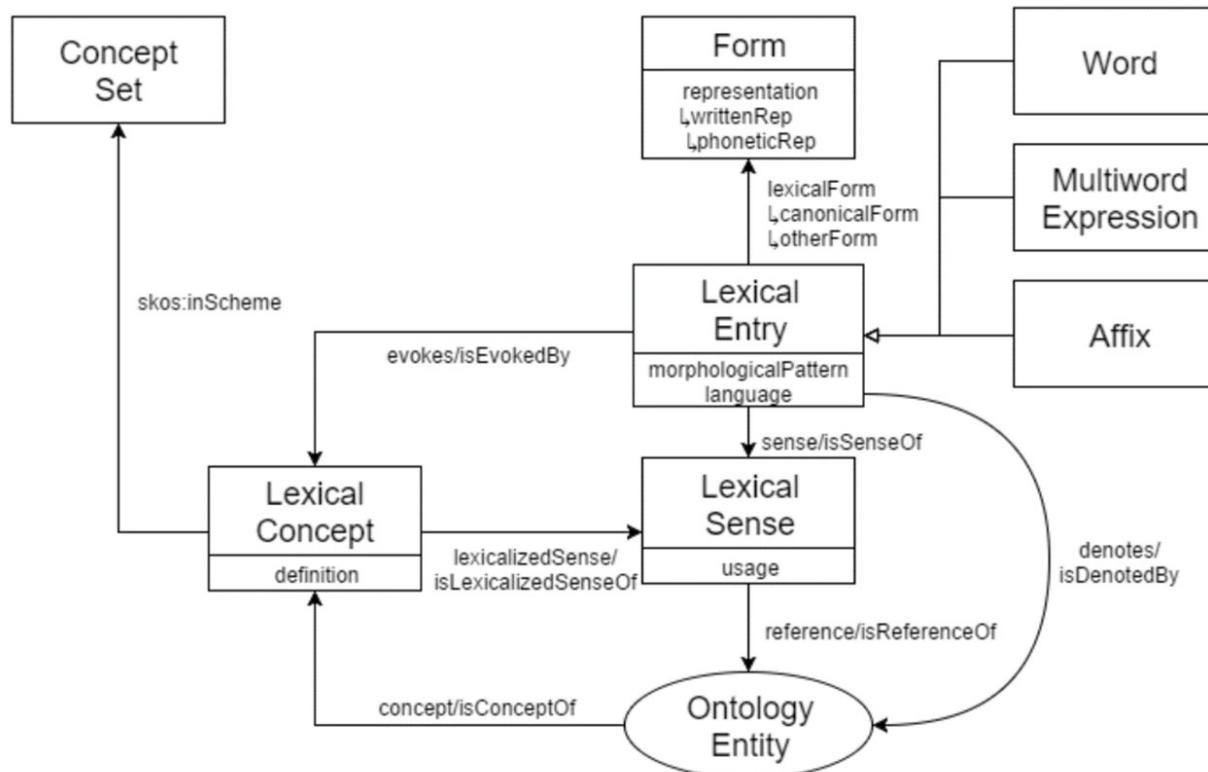

Figure 1 Lemon_OntoLex_Core.png

The Linguistic Dimension?

Ontolex-Lemon: Lexicon Model for Ontologies

<https://www.w3.org/2016/05/ontolex/>

Ontologies are an important component of the Semantic Web but current standards such as [OWL](#) only support the addition of a simple label to entities in the ontology. It is not currently possible to add inflected forms, different genders, usage notes or create a full lexical resource such as Princeton WordNet, or the Open Ancient Greek Wordnet.
